CLEANING & MAINTENANCE

Keep the Therapure® functioning properly by cleaning the permanent HEPA-type filter every four weeks. More frequent cleaning will be necessary if the unit is located in an area with a high level of airborne contaminants (excessive amounts of smoke, pet dander, etc.).

NOTE: Always make sure the Therapure® is turned off and unplugged before cleaning.

» Vacuuming will restore performance of the permanent HEPA-type filter. However, the filter may appear stained. This is normal and does not affect performance in any way.

» Do not use water or any household cleaners or detergents to clean the permanent HEPA-type filter.

» The inlet grill may be cleaned (after unit is turned off and unplugged) with a vacuum or a slightly damp cloth.

Cleaning the permanent HEPA-type filter (steps 1-4 shown).

1. Release the inlet grill by pressing on the locking latch (see diagram of Main Parts).
2. Remove the inlet grill from the unit as shown below.
3. Grasp the left and right frames of the permanent HEPA-type filter through the indentations on the sides of the filter enclosure and remove the filter.
4. To clean the permanent HEPA-type filter, use the brush or crevice attachment with a vacuum cleaner. Run the attachment along the inlet and outlet side of the filter, cleaning between the crevices as much as possible. Do not use water or any household cleaners or detergents to clean the permanent HEPA-type filter.
5. Once the permanent HEPA-type filter has been cleaned and checked for any possible damage, replace the filter back in the reverse direction described here. Exposing the Therapure® to candle/oil/fireplace soot and smoke is not recommended and will require more frequent cleaning.
CLEANING & MAINTENANCE

Cleaning External Surfaces
1. Turn off and unplug unit.
2. Use a washcloth slightly dampened with a little water and dishwashing soap to wipe the outer case surfaces.
3. Do not allow water to slip into the internal parts as this could damage your unit and result in electrical shock and injury to you.
4. Allow the unit to thoroughly dry before use.

UV Lamp
The lifetime of the UV lamp is up to 12 months of continuous, effective operation. After this time, the bulb may remain illuminated, but its effectiveness is greatly reduced. For maximum effectiveness, please replace the UV bulb annually.

If the lamp stops functioning or needs replacement, please visit our web site at www.envionproducts.com to order a replacement lamp. Or call 1.800.875.8577.

Caution:
• Do not touch the glass part of the lamp. Oil from fingertips will decrease the effectiveness of the lamp.
• Never operate the unit without a filter or with a damaged filter. UV lamp cover must be installed at all times. The UV light from the UV lamp will result in severe damage to eyes and could cause blindness.

UV Lamp Notice Warning:
UV Light is harmful to bare skin and eyes and can cause temporary or permanent loss of vision. Never look directly at the UV lamp while it is illuminated—doing so could cause loss of vision!
